

## October 8 DLG Contest Report — by Scott Fintel

Was a fantastic day; Extremely dense fog all through Portland, Beaverton, and Newberg - but our little chunk of airfield in St. Paul was remarkably clear. Here's a panorama from about 400 feet up -

<https://photos.app.goo.gl/Ej5UDEo7D4YHns5PA> (Click on the image, and you should be able to zoom around)

Started out at a balmy 65 degrees or so, and ended at 86 in the afternoon. Winds shifted a little, but were coming up from the south, heading north, which made things a bit interesting.

While we didn't have a big crew, we were still able to fly 6 rounds; With an odd man out, I ended up using the LUA timer on my Taranis - this worked extremely well, as we didn't have extra timers. As Craig mentioned, instead of doing random rounds, this time we did as SASS did the previous weekend, and ran 2 groups; your scores from previous round decided which flight group you'd be in the next round. All scores were within 85% of the top score, which kept things interesting to the end.

Congrats to the podium:

- 1 Craig R
2. Lance O
3. Scott F

I want to call out Ivan C, who hasn't flown the entire year, and yet, came out for the first time and flew fantastic - It was great to see you again. Lance, who is probably the most improved over the year, and was completely set up a the field, before even Craig and I got there! Congrats on a great year Lance. Bill brought out an Ultima 2, and we did some big-bird flying after. And finally, thanks to Craig for all the support this year - from supplying CD essentials, suggestions on wing repairs, and even for giving me a lift, as the all the cars in the house were spoken for with a new teenage driver. Thanks for the assist as always!

That's it for PASS in 2022. It's been a great year, and a good way to spend a Saturday.

Scott
